## **Subject Matter/Background**

#### AS SUBMITTED BY CHRISTINE GIBBONEY, PLANNING & ZONING MANAGER:

Proposed amendment to Section 1133.02 of Chapter 1133 Off Street Parking and Loading Regulations to reflect the intent and application of the Section. See Staff Report attached hereto as Exhibit 1. Recommended changes to the first sentence of Section 1133.02 are as follows:

### History (2014-2015)

In 2014-2015 a comprehensive zoning code analysis conducted in partnership with City Architecture produced code amendments and new code sections to support the city Master Plan. The code amendments included: Signage, Landscaping, Off-Street Parking, and creation of the Mixed-Use Overlay Districts. The amendments were vetted at the PC/DRB level and through 3 readings at the City Council level. References as to the purpose and reasoning for these amendments point to the Master Plan, creation of uniform standards, and code enforcement efforts, coordinated development within the downtown revitalized area, and establishing a requisite number of parking spaces.

There is a section of this Chapter (Section 1133.02 - first sentence) that staff believes to be intended for Commercial/Business, but as written, does not specify this, and raises questions with regard to interpretation:

#### **CURRENT:**

Off-street parking shall be provided as a condition precedent to the occupancy or use of any building, structure or land, and at any time a building, structure or use of land is enlarged, expanded, increased in capacity or use, in conformance with the following provisions.

#### PROPOSED:

Off-street parking shall be provided as a condition precedent to the occupancy or use of any building, structure or land, and at any time a commercial or business-related building or structure, or commercial or business-related use of land, is enlarged, expanded, increased in capacity or use, in conformance with the following provisions.

#### **Financial Review**

No Financial Impact.

## **Legal Review**

The matter has been reviewed, follows normal administrative procedure and is properly before you.

#### Recommendation

If Council is in agreement with the request, a motion placing Ordinance No. 2025-30 on its third and final reading

is in order.

## October 15,2025 -PLANNING COMMISSION RECOMMENDATION: The Planning

Commission reviewed this proposed amendment at their regular meeting of October 15, 2025 and made recommendation to City Council in support of the proposed amendment as presented.

## Subject/Background

Proposed amendment to Section 1133.02 of Chapter 1133 Off Street Parking and Loading Regulations to reflect the intent and application of the Section.

## History (2014-2015)

In 2014-2015 a comprehensive zoning code analysis conducted in partnership with City Architecture produced code amendments and new code sections to support the city Master Plan. The code amendments included: Signage, Landscaping, Off-Street Parking, and creation of the Mixed-Use Overlay Districts. The amendments were vetted at the PC/DRB level and through 3 readings at the City Council level. References as to the purpose and reasoning for these amendments point to the Master Plan, creation of uniform standards, and code enforcement efforts, coordinated development within the downtown revitalized area, and establishing a requisite number of parking spaces.

There is a section of this Chapter that staff believes to be intended for Commercial/Business, but as written, does not specify this, and raises questions with regard to interpretation:

## 1133.02 DETERMINATION OF REQUIRED OFF-STREET PARKING SPACES.

Off-street parking shall be provided as a condition precedent to the occupancy or use of any building, structure or land, and at any time a building, structure or use of land is enlarged, expanded, increased in capacity or use, in conformance with the following provisions.

In computing the number of parking spaces required by this Ordinance, the following shall apply:

- (a) Where floor area is designated as the standard for determining parking space requirements, floor area shall be the sum of the net area of all the floors measured from the exterior faces of the building. Mechanical rooms, stairs, restrooms, cellars, unenclosed porches, attics not used for human occupancy are excluded from the count of total floor area.
- (b) Where seating capacity is the standard for determining parking space requirements, the capacity shall mean the number of seating units installed or indicated. When fixed seats are not indicated, the capacity shall be determined as being one (1) seat for each twenty (20) square feet of floor area of the assembly room.
- (c) Where employees are the standard for determining parking space requirements, employees shall mean the maximum number of employees on any two (2) successive shifts.
- (d) Fractional numbers shall be increased to the next whole number.
- (e) The parking spaces required for multiple uses shall be the sum of the parking required for each use considered separately. (Ord. 2015-10. Passed 8-25-15.)

Staff questioned the application to residential structures as it would seem unreasonable to require an applicant to become compliant with the off-street parking regulations when just proposing to enlarge, expand, etc. Staff researched the minutes and staff reports from the time this section was proposed and consulted with the Planning Commission Chairman Boyle who agreed the intent of 1133.02 was for Commercial/Business use and further noting that the subsection language itself (a thru e) is not referencing any residential based criteria, it is speaking to Commercial/Business.

Legal Counsel has advised, that as currently written, this section would be applicable to residential. It is important to note that staff **has not** applied this section to residential applications as research into the code raised questions related to the intent.

In order to clarify this section and avoid any misinterpretations in the future, we are recommending an amendment to Section 1133.02 which Legal has drafted:

## 1133.02 DETERMINATION OF REQUIRED OFF-STREET PARKING SPACES.

Off-street parking shall be provided as a condition precedent to the occupancy or use of any building, structure or land, and at any time a commercial or business-related building or structure, or commercial or business-related use of land is enlarged, expanded, increased in capacity or use, in conformance with the following provisions.

In computing the number of parking spaces required by this Ordinance, the following shall apply:

- (a) Where floor area is designated as the standard for determining parking space requirements, floor area shall be the sum of the net area of all the floors measured from the exterior faces of the building. Mechanical rooms, stairs, restrooms, cellars, unenclosed porches, attics not used for human occupancy are excluded from the count of total floor area.
- (b) Where seating capacity is the standard for determining parking space requirements, the capacity shall mean the number of seating units installed or indicated. When fixed seats are not indicated, the capacity shall be determined as being one (1) seat for each twenty (20) square feet of floor area of the assembly room.
- (c) Where employees are the standard for determining parking space requirements, employees shall mean the maximum number of employees on any two (2) successive shifts.
- (d) Fractional numbers shall be increased to the next whole number.
- (e) The parking spaces required for multiple uses shall be the sum of the parking required for each use considered separately. (Ord. 2025- XX. Passed )

Re: Recommended FY 2026 Budget

Date: November 17, 2025

In accordance with Section 6.05 of the Huron City Charter it is my pleasure to present to you the City Manager's Recommended FY 2026 Budget. The 2026 budget document aims to blend realistic revenue and expense projections for next year in a manner that seeks to provide a high level of services to our residents, businesses, and property owners while also realizing increasing costs are putting stresses on the budget availability. The 2026 budget, coupled with the Capital Improvement Plan and the updated Vision 2020 Action Plan, also serves to make recommended capital investments throughout the City.

This 2026 budget was presented through an online interactive platform, called OpenGov<sup>1</sup>, intended to provide the reader with multiple levels of information including: a user guide, defined city policies, the budget process, fund breakdown, debt obligations, capital equipment summary, and capital improvement plan (CIP). While establishing a plan for 2026, this budget additionally forecasts the impact of its adoption through 2035. With this being said, an emphasis was put on balancing the budget over the five (5) year forecast. Detailed plans have been analyzed and included for all City operations on an annual basis for 2026 through 2035. Inflationary cost and revenue adjustments have been made for all departmental activities as well as inclusion of capital investment expenses over the next ten (10) years. Council went through a master plan update (included in the budget book), termed the Vision 2020 Action Plan in 2021. The CIP references various initiatives that were prioritized in the master plan to be undertaken in the next 3-5 years. We also incorporated a new column in the CIP. The CIP now labels each project as "new" or "maintenance". "New" meaning the project is more of an addition or a wish list item and "maintenance" is more of a necessity in the sense that the City already owns a project or facility that must be maintained.

The City's adopted General Fund Balance reserve policy is reflected on an annual basis through 2035. The policy requires a minimum available surplus of 15% (a maximum of 25%) of operating expenditure. Based on year-to-date activity, the City's General Fund is expected to fall within the 15% to 25% range. The General Fund is expecting to maintain a 15%+ reserve or higher through 2032. The City historically has made year end transfers from the general fund to the Capital and payroll stabilization funds (for example) and the administration is still determining if these similar transfers can be made at year end. This reserve has a direct impact to the City's Bond Rating and spending plans and is trending in a positive direction. The City received an upgraded rating upgrade to AA2 which is the highest in the City's history.

Fiscal controls have been put into place to both protect the fiscal solvency of the City and ensure our employees and community at large are insulated from as much as harm from unexpected events as possible. Based on those measures and in combination with various aid programs and economic development activities, the City has improved its annual fiscal position while also ensuring stability. A great deal of this financial activity and benefit has been rooted in economic development projects - years in planning - that are beginning to positively impact the City's budget – and therefore operations. The City will continue to monitor these projects and related revenue streams to determine how and when

<sup>&</sup>lt;sup>1</sup> Online Budget Book Link

additional investments can be recommended and planned for – while simultaneously exploring additional economic development projects that will benefit the community and enhance quality of life for all.

The FY 2026 Budget provides an opportunity to continue that dialogue and exploration with the ultimate goal of strong and reliable service delivery. As resources remain above the minimum General Fund reserve, the City has to balance additional investments in areas such as parks and recreation, economic and community development, fleet and facilities, and infrastructure verses balancing restricting spending to ensure that as our operating costs continue to exceed our increase in revenue, that enough is held in reserve to ensure a balanced budget. Additional investments with General Fund reserves are becoming increasingly necessary for operational needs in areas that are traditionally supported by other taxes and contributions. The City's General Fund subsidized nearly \$600,000 of operations for the Parks and Recreation Department, Fire Department and Street Department in 2025. Additionally, with the failed income tax levy, the City has an even greater sense of urgency to either search for alternative revenue streams such as income tax or departmentally focused levies, or must develop a plan to eliminate or defer capital projects and capital equipment purchases. During this years budget we started to remove non essential purchases and shelved capital projects, which you will see noted on each department's story page. This was essential to balance the budget over the short term (five years). As shown in each department's budget summary<sup>1</sup>, continuous increases to departmental operations is not a sustainable practice. The 2026 budget book was recommended to Council by the Finance Committee with a request to continue to investigate options to increase revenues in an attempt to avoid service cuts. One option is to take an additional 1.5 MIL Fire levy to the voters in May of 2026, and another is to increase the stormwater fee charged to residents. The threat to our traditional revenue streams (income tax and property tax) from the County and State are very real and all resources must utilized to challenge these pieces of legislation.

## Financial Performance - A Review 2025

<u>General Fund Performance</u>: Staff has projected that we will end FY 2025 with over \$1.5 million in unencumbered fund balance, a factor of 25%. Budgeting conservatively for the next ten years, the General Fund is expected to maintain a 15% or higher fund balance reserve. However, potential debt liabilities for planned capital projects, along with increased subsidies to departmental operations without additional revenue sources such as grants, low-interest loans, or increased income taxes will lower the General Fund reserve balance under 15% by 2032.

<u>Revenues</u>: The City's major revenue sources, such as income taxes and utility charges, have seen inflationary increases over the past few years. However, in 2025, the City's income tax is trending 10% higher than in 2024 (equating to approximately \$400,000). City property taxes and state taxes (e.g., gas tax) have remained consistent over the last 3 years, resulting in additional General Fund subsidies to various operational funds such as the Street Maintenance Fund and Parks and Recreation Fund. Property taxes were expected to increase significantly due to the tri-annual property re-evaluations, but with the County's action to roll back some of this funding the City's property tax revenue is estimated to decrease by \$37,000 in 2026. The City had budgeted conservatively, not counting on a property tax revenue increase, so overcoming this challenge is manageable.

The main source of revenue within the General Fund is the collection of an income tax on all withholdings and corporate net profits. Staff are forecasting a 0% increase in income tax collections for 2026 due to the increased performance of 2025 collections compared to 2024 (10% increase thought Oct 2025). The City will need to monitor income collections closely in 2026, as the last 3 years have

proven volatile and varied greatly from our previous projections.

Staff conservatively budgeted increases for all other revenue sources at 1-2% unless historical trends show consistency in annual revenue.

New initiatives/Revenue in 2025/2026: Two years ago, the City's Utilities Committee, Finance Committee and Council approved the first water rate increase in fifteen (15) years. Starting in 2023, water rates increased 5% annually for ten (10) consecutive years. These rates will be studied tri-annually to determine if additional measures (in the form of increases or decreases) are warranted, with a rate study undertaken this year. The result of this study was to keep the proposed increases in place as the water fund continues to run slightly lower each year. The rate increase is critical for ensuring the City's ability to maintain water security for our customers as well as to undertake a series of major capital projects to ensure the long-term viability of our system. These projects include, but are not limited to, creation of a secondary water intake on the Huron River, South Main Street watermain replacement, which was completed in 2025, various water line replacements, and construction of a new 2-million gallon elevated water tank on the west side of town. The City did receive a \$5 million grant from the State of Ohio to help construct a new elevated water tank and managed to secure a 0% loan for the remaining balance from the EPA to help reduce local costs.

Huron Public Power had a rate increase approved in September 2025. After a rate study and internal review, this increase was kept as low as possible, designed to cover debt incurred this year for the addition of the third transformer and expansion efforts while also building an operating reserve to protect the utility from unforeseen expenses for financial shocks.

Finally, the City began work on various capital projects throughout the City. The South Main Street Corridor Streetscape is expected to begin construction in 2026 – as detailed design and engineering is ongoing. The City has been awarded over \$630,000 in grants from various agencies, including ARPA funds, to subsidize design and construction costs. The City is also getting ready to start the bidding process for Route 6 – Phase II, of which the City managed to get awarded over \$1M of the costs, the 2.0M gallon elevated water tower project is underway and the secondary intake project is in final design – the latter two projects are to be paid out of the water fund and low interest loans or grants and do not impact the general fund or our direct debt limits.

### **Budget 2026**

The 2026 budget was built with a mindset of caution, especially with the uncertainty of current economic inflationary trends and the volatility of healthcare premiums. The City is ending 2025 in a positive financial position to implement the 2026 budget, however, a great deal of work will be needed to investigate long-term sustainability of operations and capital projects due to the above-mentioned inflationary pressures. In 2025, income tax is actually projected to be higher than the previous year, which is promising. Continued revenue shortfalls in other operational funds and rising healthcare costs requiring more subsidy from the General Fund finishing out 2025 and 2026. Items of note in the 2026 budget include:

<u>Property Tax Revenue</u>: Real property valuations significantly increased in 2025. General Fund property tax revenue increased 18% in 2025 compared to 2024. This largely increased due to the real estate reevaluation process at the county level. Based upon current estimates provided by the county, General Fund property tax revenue is estimated to total \$465K in 2026, an 11% increase from 2025. This amount

is an estimate after the amendment made by the county to reduce the amounts collected on rollbacks and homestead exemptions. Property tax revenue for the Fire Levy Fund is expected to remain generally the same.

<u>Income Tax Revenue</u>: Staff conservatively forecasted this vitally important revenue stream for 2026, the City is not budgeting for an increase in income tax revenue due to the 10% increase seen in 2025. This measure is keeping income tax revenue projections at \$4.4 Million for 2026. Staff will monitor income tax revenue carefully to determine if budgetary amendments are needed in the event income tax revenue continues to increase or starts to decline throughout 2026.

<u>Personnel:</u> The 2025 budget includes the addition of a Fire Chief. The Fire Department has run under the command of our three Captains, but the time has come to revert to a Chief taking command again. With the transition of the Service Director to the City Managers position, the Service Director position will remain unfilled. However, a new position of Service Manager will be created saving the City money. The IT Manager positions will be eliminated and replaced with a Technology Manager, also saving money.

Parks and Recreation Revenue: Overall, Parks and Recreation budgeted revenue decreased from 2022 by \$50,000. This is primarily due to the reduction in contributions from the Huron Joint Recreation District (HJRD) - more specifically, due to the Huron School District voting to forego its regular 10% contribution that has historically been received by HJRD. Total revenue is anticipated to remain at this level into the foreseeable future. The 2026 budget does not include the School District's contribution. Maintaining the operations of the Parks and Recreation Department is mostly dependent on the Huron Joint Recreation District's annual contribution, making up 65% of the total budget in 2026. Any net impact on HJRD contributions could result in budget cuts directly related to services provided to residents. Although parking fee revenues at Nickel Plate Beach have increased the last two years, the Parks and Recreation budget cannot financially maintain the current operational budget without additional revenues. In 2025 and continuing in 2026, the City's general fund is subsidizing personnel costs. Based on current projections, the fund balance in the Parks and Recreation Fund is expected to decrease by \$25,000 per year and fall to an unsafe balance in 2033.

<u>Capital Assets:</u> The 2026 budget book includes the City's capital asset replacement schedule. The schedule shows the City's commitment to purchasing and maintaining adequate vehicles and equipment for City services. In 2025, the City spent over \$300,000 on new vehicles and equipment. The recommended 2026 budget includes the purchase of two (2) new police cruisers (lease), one (1) new parks truck replacement, one (1) pickup truck replacement for the streets department. totaling over \$300,000 in capital asset expenditures.

<u>Capital Projects:</u> The 2026 budget book also includes the City's current capital improvement plan. Although the City's current capital improvement plan totaling over \$48 million scheduled and includes over \$18 million in unfunded projects over the next ten (10) years, the City is tentatively committed to spending over \$23 million on major capital improvements in 2026 if budget permits. Major 2026 capital expenses include the S. Main Street streetscape engineering and construction, Rt. 6 Phase II commencement of construction, secondary intake design and construction commencement, and elevated water tower construction. As previously mentioned, due to the failure of the income tax levy in 2024, the City will be evaluating its ability to undertake capital projects beyond minor maintenance in 2026 and beyond.

<u>Debt Management:</u> Starting in 2014, the City began a strategy to invest in critical capital infrastructure

that had been underinvested in as the City recovered from the Great Recession. Utilizing historically low interest rates, close to \$15 million worth of capital was invested in critical infrastructure projects. In 2024, Moody's upgraded the City's current rating of Aa3 to Aa2. The City currently has over \$12 million in outstanding bonded debt, not inclusive of programmatic loans. As we plan for future years of investment, 2023 was the first major milestone to consider as a substantial portion of the City's debt was retired, freeing up additional resources available for debt service as well as capacity. The City took fiscally responsible steps in 2023 to develop a debt strategy for future capital needs and wants, including projects related to the Sawmill Creek Resort TIF, ConAgra redevelopment, comprehensive local street resurfacing, Huron Public Power Expansion, and Main Street redevelopment. In 2023, the City issued long-term bonds on public improvements funded through the Sawmill Creek Resort TIF and issued GO bonds in 2024 to cover the local street reconstruction of the Chaska and Old Homestead I and II neighborhoods.

<u>Future Policy Discussions</u>: The staff also looks forward to engaging Council in 2026 on several larger and impactful project and policy discussions including, but not limited to, the list below. The Finance Committee recommended the 2026 budget to Council and also recommended Council to further review and consider several items on the list below.

- New taxes and or levies to support essential services and public improvements in the master plan
- Storm Water Management Fee
- River Road property planning.
- Future of the City Property on Cleveland Road W / Atwood / Linden
- Conagra Redevelopment Service/Maintenance Facility Construction
- Capital Improvement Program Financing Plan (continued discussion)
- Future Expansion of Huron Public Power

This budget is the work product of countless hours of preparation, analysis and input from a wide variety of personnel. I appreciate the time, effort, and input of all department heads and staff members who have been instrumental in providing information, feedback and capital projections for their respective departments - and the coordination and leadership displayed by the Finance and Service Departments. I also want to thank the Finance Committee who have been tremendous stewards of the 2026 budget process and have brought forth expertise and thought-provoking considerations and dialogue.

## Subject Matter/Background

In following up to last week's OML Webinar about the PFAS water settlement, I wanted to reach out to see if your client, the City of Huron, needs any additional information as you make the determination if you want to file a claim. As I noted during the online discussion, the registration process needs to be completed by the end of the year.

As I noted, four manufacturers (3M, DuPont, Tyco and BASF) have settled part of a multidistrict litigation suit filed in federal court arising from claims against manufacturers and distributors of PFAS or "forever chemicals." The settlement centers on the contamination of public water systems' drinking water – while other PFAS-related claims remain. The total public water system settlement amount exceeds \$13 billion. This amount was set in part because of the anticipated cost of cleaning up contaminated water systems.

Currently, the settlement process of this litigation is in "Phase 2" where most public water systems are eligible to evaluate and submit claims. Huron is expressly listed as a potential Phase 2 claimant in court documents.

The law firm of Grossman & Kelly, LLP has been working with the owners of public water systems to submit and advocate for the claims for compensation from this class action settlement. Kegler Brown has been operating as local counsel on this matter.

If the Grossman firm is retained, the water of public water systems will be tested at no charge to the client. If the unfortunate happens – there is a detectable presence of PFAS and related chemicals in the tested water – Grossman & Kelly will submit and defend the client's claim for the payment of damages. Kegler Brown will facilitate related legal services. Provided that a substantiated claim of damages is successfully established, clients will be compensated over time according to a matrix which factors in the level of pollution in the impacted water source and along with its flow rate. If there is no PFAS in a client's water, the legal engagement for this matter ends.

Unlike some other class action lawsuits, an eligible claimant for settlement proceeds must take the affirmative step of submitting a claim. Failure to do so will result in the forfeiture of the right to bring any action later for drinking water-related PFAS claims, as there are firm deadlines for those plaintiffs to submit their claims, and the deadline to opt out of the settlement has passed. Ultimately, once all eligible, submitted public water system claims are paid, any balance in the settlement proceeds will be returned to the manufacturers.

To: Municipal Leaders and Water Utilities

From: David Grossman Esq. Re: PFAS-AFFF ABATEMENT

There is a time limited opportunity to recover costs relative to PFAS contamination which protects taxpayers. Various regulations and standards require PFAS levels to be reduced to near zero and this burden falls on taxpayers. We help shift that burden to the polluters by enrolling municipalities and water utilities in a cost recovery program where tens of billions are available. The polluters should pay for the cleanup not the taxpayers.

# **PFAS COST RECOVERY**

Our purpose is to represent municipalities and water utilities in a cost recovery program regarding PFAS contamination of water pumping stations, firehouse departments and training centers, airports and landfills. PFAS is a carcinogen that resides in the ground around these sites. We are offering to help collect those funds for harmed communities by making the polluters pay to clean up the messes they made instead of the taxpayers.

### PFAS EXPOSURE INCREASES RISK FOR

• Kidney Cancer • Liver Cancer • Preeclampsia • Pancreatic Cancer • Testicular Cancer • Prostate Cancer • Thyroid Disease • Thyroid Cancer • Ulcerative Colitis • Breast Cancer • Bladder Cancer

## THE FUND HAS BEEN CREATED

Billions in funds have been posted by companies such as 3M, Dupont and others. Our goal is to protect taxpayer funds and hold the polluters accountable. Ongoing multidistrict negotiations related to PFAS contamination has created this pool of money. Specifically, the case has been partially resolved for water systems across the country impacted by PFAS. Open enrollment is now with secondary litigation for other sites, and our firm is focused on making onboarding of affected communities as easy as possible.

# **OUR APPROACH**

Our team is a national litigation group providing representation to persons in class action lawsuits and complex multidistrict cases. There is never a financial outlay by the client. We advance all costs and if there is no recovery we have taken the risk because we have done the research and believe the case was worth bringing. We request an authorized person sign the letter of engagement before time runs out.

Join the list of forward-thinking municipalities that have already partnered with us to secure the funds necessary to combat PFAS contamination. To participate we simply request you execute our no risk standard contingency fee agreement attached to this memo. If you have any questions do not hesitate to contact us. Thank you in advance.

- (b) The City may expend up to Twenty-Five Thousand Dollars (\$25,000.00) per occurrence or series of occurrences with the approval of the City Manager or City Manager's designee, and the Director of Finance, to the extent there are appropriations therefor, for any public improvement, or the purchase of equipment, materials, or supplies, or to obtain professional or personal services or for any other lawful purpose. The City Manager may designate approval to the Director of Finance for purchases made up to Three Thousand Dollars (\$3,000.00). - (i) After the approval of requisitions and after the certificate of the Director of Finance has been signed, which may be electronically, stating that the funds are available for such purchase from the proper fund, the original purchase orders shall be issued to the vendor, supplier, or person rendering the required service.
- (j) A second (carbon) copy of every purchase order shall be immediately posted to the encumbrance ledger and such sum shall be subtracted from the respective appropriate account. All second (carbon) copies or purchase orders shall be kept in numerical filing order in the custody of the Director of Finance, unless retained electronically.
- (k) All vouchers and warrants for the disbursement of City funds shall bear the purchase order number authorizing such expenditure when so applicable. If there is a difference in the quoted purchase order price and the invoice or final price, such difference shall be reconciled immediately with the encumbrance ledger, with such explanation within the voucher as to difference in price as the Director of Finance or City Manager may require or deem advisable.

(1) The City Manager, together with the Director of Finance, shall sign all warrants, vouchers and checks or any contract involving the disbursement of City funds, which may be done electronically.
